Mapping Spectrum to other standards

This section of the website is aimed at system developers who want to map relevant Spectrum units of information to other widely-used standards within the cultural heritage field.

Please note that commercial use of Spectrum must be licensed by Collections Trust through our [Spectrum Partners](#) scheme. Please read our [Spectrum licensing](#) conditions carefully and if you are not sure whether your proposed use of Spectrum counts as commercial or non-commercial, or have any other questions about licensing the standard, please [contact us](#).

If you have questions or comments about any of these mappings, please contact our Standards Manager, [Gordon McKenna](#).
